Harmonies of Water: Exploring Creativity in Nature

Dive into the world of water, music, and film

- **Music:** Create melodies inspired by the soothing sounds of nature and the enchanting River Vltava.
- **Explore filmmaking:** Bring stories to life as we capture the magic of water through short film.
- **Get inspired:** See how artists have used water as inspiration for their creativity.

If you have a passion for (or just an interest in) music, film, or water, join Mr. Hudson and experience the fun of creating water-inspired music, filming by the river, and unveiling your artistic talents. Connect with your peers, nature, and your inner artist.

Let's make waves together.

Please note: This project will be conducted in English. And while no experience or musical talent is required (the teacher has none), students *with* musical talent or filmmaking experience are especially welcome.
