

Autumn in Colors at PORG

Dear Parents and Children,
October has brought brightly coloured leaves on the trees as well as lots of hot, sunny days. We started the month with an amazing “Welcome Party “, held on 2nd October. Luckily, the weather held up and we got to enjoy the party in the garden. In addition, we had many activities in the classrooms. We greatly appreciate our wonderful gift, the heated party tent from one of our kind parents. We also got to enjoy the tasty refreshment such as donuts, cupcakes, gingerbread cookies, and many more from the kindergarten parents. Furthermore, the chef from our canteen, Mr. Neuvirt made fresh juicy cider from apples collected by Miss Monika and Arnie. We hope you had a great time as much as us chatting and enjoying each other’s company.
During one of our lessons, Mr. Otto introduced the children to the possibilities of the digital tool, Spherbolt mini. They had a lot of fun with the robotic balls.
On 17th October, our children took carving and decorating pumpkins that they had planted in our garden. The pumpkins turned into Jack – o- Lanterns, monsters, mummies and many more.
On the last day before autumn break, we celebrated the popular festival Halloween. At first, we went for trick-or-treat around PORG campus to get something sweet. Then, we got to enjoy a spooky fiesta, played games and had a parade of the children showcasing their different costumes at the PORG gym.
At the end of October, our kindergarten had their autumn break and enjoyed a week off. We hope everyone had a great time to relax!

Welcome party

Everyone was welcome, and everyone enjoyed it - kids, adults, teachers, really everyone!

Digital tools with Ota

“Whoever plays doesn't cause trouble!" :-) ... and why not learn the basics of programming while doing it?

Haloween 2024

Just like every year, we really enjoyed Halloween this year too. It was preceded by a lot of creative work - carving and decorating pumpkins, and there were really a lot of them! :-). After we made Jack o' lanterns, scarecrows, spiders, and little figures, we had a great party and went out to trick or treat!

Let's go for it, let's have a lot of fun!

Trick or treat

"Science" and "Povídálek"

So, how are the children doing in our extracurricular clubs "Science" and "Povídálek"? They're having fun here as well. Sometimes it's quite hard work :-), but everyone enjoys it. Who wouldn't want to improve their voice and breathing while painting by blowing through a straw, or discover various interesting things through fun experiments :-)?

Little Tigers
