NEWSLETTER
JANUARY 2025

Dear Parents and Children,

January has passed so quickly, and we present to you the first newsletter of year. We hope you have enjoyed the first month as we did. At the beginning of January, our Puffy Clouds children went skiing in Skalka. They spent a week out in the fresh air developing their skiing skills on the slopes.

We had the privilege of hosting the Music workshop led by Mrs. Johanka. This time the theme was winter. The children sang and played Orff's instruments and listened to “Air” composed by Johann Bach Sebastian. What an unforgettable experience it was!

On another note, the kindergarteners got to experience the Science Workshop with Mr. Otto in the virtual classroom in PORG grammar school. They explored the digital world with special VR glasses and worked on the tablets. They met dinosaurs, monkeys in the jungle and explored outer space with the VR glasses. Wow!

On 23rd January, Open Day was held in PORG Kindergarten. We welcomed a lot of children and their parents, who are interested in what we do here.

On 29th January, children visited the European Days presented in PORG primary school. We had a chance to travel around Europe, see interesting places and learn about different cultures. We are thankful for the invitation.

To start off the new year, we celebrated some birthdays. The children have been growing up so fast since they came to our kindergarten for the first time, haven’t they?

Wishing you to have a lovely spring holiday!

SKI COURSE

AAren't they champions? This is what this year's ski course in Skalka looked like! Hats off to their performances, but the most important thing is that everyone enjoyed themselves and had fun. So, see you again next year!

MUSICAL MOVEMENT WORKSHOP

Lots of music, singing, dancing, playing various musical instruments, movement, and even relaxation – that's what the absolutely amazing workshop led by Johanka Černohorská was all about.

Virtual reality Workshop

This is what education and child development look like here at PORG – modern and immersed in the virtual world! The children were absolutely thrilled, and at the same time, through various educational programs, they practiced spatial orientation, colors, geometric shapes, completing sequences, observation, attention, and more. Well, this was absolutely awesome! There's nothing more to add!

Open Day

As every year, we held an Open Day at our kindergarten and school, and once again, there was great interest. The preschool was full of parents and children, so now we're just looking forward to meeting our new friends who will join us next year :-).

European days at school

The children had a fun and very educational morning at school when we visited the 'European Day' project. Not only did we learn a lot of interesting information about various European countries, but the children also had the opportunity to take part in activities prepared by the students. We even got to taste some delicious specialties.

Little Tigers | Little Fish | Puffy clouds

Songs & rhymes

Songs

“Snowky Pokey”
“My tři králové ”
“Na lyže”

Songs

“Jolly Phonics songs”
“My tři králové”
