NEWSLETTER NOVEMBER 2025

MONTHLY NEWSLETTER FROM MŠ PORG BRNO

Time flies, and we are happy to share with you our November newsletter. November was a truly busy and exciting month in our kindergarten.

We enjoyed a variety of classroom activities, special projects, and celebrations that kept us learning, creating, and growing together.

Our preschoolers had a very important experience — they visited the PORG Primary School at Mendlovo náměstí, where they got a first glimpse of what school life looks like. They met new teachers, explored classrooms, and tried out activities designed just for them. We are very proud of how confident, curious, and enthusiastic they were during the visit.

MUSIC TIME

This month, the Little Mice had the opportunity to experience a special activity — music therapy.

Through rhythm, sound, and musical play, children explored emotions, practiced listening skills, and connected with one another in a calm and joyful environment.

JOLLY PHONICS IN OUR KINDERGARTEN

We are happy to share a little insight into how children learn English through the Jolly Phonics program in our classrooms.

Jolly Phonics is a fun and interactive method that introduces English through sounds (phonics) rather than memorizing whole words. Children learn each sound through movement, stories, music, and visual symbols — which helps them connect meaning, pronunciation, and memory in a natural and playful way.

During lessons, we:

- listen to short stories connected to each sound
- sing special Jolly Phonics songs
- practice movements that help children remember how each sound is made
- use cards, games, and multisensory activities to support learning
- encourage children to identify sounds in simple words

We also receive beautiful feedback from them — many share that they look forward to the lessons, sing the songs at home, and proudly show what they have already learned.

FARM VISITORS

In November, the children from Little Frogs class also visited the farm U tří koníků.

BIRTHDAY BLISS

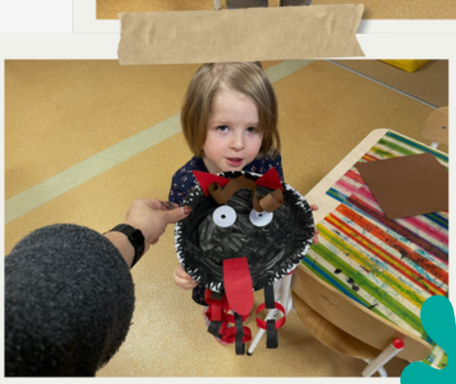

ARTS AND CRAFTS

LIBRATY TIME

This month, our kindergarten was filled with fun and learning as we explored the topic of health across all classrooms.

The theme reminded us how important it is to take care of our bodies and make healthy choices every day.
