March in our garden

Dear Parents and Children,

March has been a month of pure wonder as we traded our heavy coats for sunshine! The children have loved becoming little explorers, spotting the first green buds and listening to the return of the birds, filling our days with laughter and renewed energy.

A huge thank you to Mrs. Johanka for a magical Music Workshop, where the children enjoyed fun rhythmic games and discovered their sense of rhythm. As part of “March is Book Month,” we explored the world of books and fairy tales and attended a theater performance by Mr. Matt’s 4th grade, themed around fairy tales.

We also participated in World Oral Health Day at the University of Ostrava, where the children learned why a healthy mouth is important for a healthy body. Our little explorers further dived into technology with Mr. Otta, trying coding with Bee-Bots and Qbots and exploring nature through microscopes.

Finally, we send big birthday wishes to our March Birthday Stars – Adámek, Davídek, and Stellinka.

Music workshop with Mrs. Johanka

On March 4th, our whole kindergarten came alive to the rhythm of hip hop, led by our wonderful teacher Johanka. Together, we enjoyed a fun-filled music and movement morning full of laughter, energy, and a little bit of joyful noise .

Even the well-known children's song "Skákal pes" got a hip hop twist and had not only the children!

Everyone also had the chance to play along using Boomwhackers, creating a truly unique musical experience together. For a while, we all turned into amazing little hip hop dancers and had a fantastic time. A big thank you to Johanka for such an inspiring and energetic morning - Hip hop!

Childrens theater performance by Mr. Matt

Our children had the chance to dive into the world of fairy tales and enjoy lovely performances "Jack and the Beanstalk" and "Cinderella". These charming and fun shows were prepared by Mr. Matt together with the school children as part of a workshop held on March 16th. The children watched with great excitement, and there was plenty of laughter, and suspense. It was wonderful to see how much everyone enjoyed the performances :-). A big thank you to Mr. Matt for the invitation and for organizing - *Great job!"

World Oral Health Day

Our children took part in an educational program organized by the Faculty of Medicine at the University of Ostrava for ***World Oral Health Day***, which took place on March 17th. Several fun and educational stations were prepared for them by the students. Through playful activities, the children learned how to take proper care of their teeth, and explored why dental care is so important. There was plenty of fun, curiosity, and hands-on learning along the way. At the end, all the children received lovely gift packages prepared especially for them.

Experiments with Mr. Otto

Another fantastic morning full of experiments was enjoyed with Mr. Otta, who this time teamed up with talented students from the quarta class. On Wednesday, March 25th the children explored magnets, looked through microscopes, tried Bee-Bot programming, and experimented with simple electrical circuits. The excitement was everywhere - shining eyes, and lots of amazed “wow!” moments, but not only the children were impressed, but the teachers were too . A big thank you to Mr. Otta and the students for this wonderful experience — we are already looking forward to more science fun!
