## APRIL ADVENTURES

April was a month full of discovery, shared experiences, and new adventures. Throughout the kindergarten, we explored the fascinating theme of Space, learning about planets, stars, and the universe through creative activities, play, and exploration.

The Little Owls Class took part in a special project day for World Autism Awareness Day, focusing on kindness, respect, and inclusion. The Little Bees Class visited a local senior home, bringing joy through their presence and shared activities. Meanwhile, the Little Frogs and Little Mice Classes started their first swimming lessons, gaining confidence in the water.

You can find out more about all these experiences on the following pages. 🚀✨
